

INTERNATIONAL EMERGING TECHNOLOGY SYMPOSIUM

APRIL 23 – 24, 2014

CRYSTAL GATEWAY MARRIOTT • ARLINGTON, VIRGINIA

The 2014 International Emerging Technology Symposium (ETS), to be held April 23-24, 2014, at the Crystal Gateway Marriott in Arlington, Va., will be the most comprehensive and informative plumbing and mechanical event since the ETS debuted in 2008.

Building upon a highly successful and universally acclaimed formula refined during three previous symposiums (Chicago, 2008; Ontario, Calif., 2010; Washington, D.C., 2012), the event will gather plumbers, contractors, engineers, manufacturers, and water efficiency experts to introduce new technologies for the plumbing and mechanical industries, and discuss how policy initiatives can drive the introduction of these technologies to market and advance the cause of water and energy efficiency. The ETS is designed to provide a portal for the host organizations' partners in the manufacturing, engineering, and trade industries to display and demonstrate their innovative solutions to legislative and regulatory developments that often alter industry landscapes.

An unprecedented number of organizations, representing the foremost leaders in the plumbing and mechanical industries, have signed on to present the symposium as co-conveners. They are: the American Society of Plumbing Engineers (ASPE), the Canadian Institute of Plumbing & Heating (CIPH), the International Association of Plumbing and Mechanical Officials (IAPMO®), the Mechanical Contractors Association of America (MCAA), the Plumbing-Heating-Cooling Contractors National Association (PHCC), Plumbing Manufacturers International (PMI), the United Association (UA), and the World Plumbing Council (WPC).
