

Maximum Performance (MaP) of WaterSense® Tank-Type and Electro-Hydraulic High-Efficiency Toilet Models

June 9, 2026

NOTE: Compiling this listing is a service of Gauley Associates, Ltd. and Koeller and Company. All of the fixtures on this list are or have been reported as certified by an accredited certification body (CB) to meet the requirements of the U.S. EPA WaterSense® specification for HETs. Information for this listing has been obtained from the WaterSense® website, CB websites, and from test reports provided by recognized laboratories participating in the WaterSense® program and believed to be entirely reliable. **NOTE: This listing is NOT the official list of the U.S. EPA's WaterSense® Program. For a full description of WaterSense, go to: <http://www.epa.gov/watersense/>**

Important note regarding WaterSense® ('WS') qualified toilet fixtures shown below: Toilet models without a MaP Flush Performance Score have not been MaP tested. MaP recommends that consumers only consider purchasing WaterSense® toilets that have been MaP tested.

DISCLAIMER: The information presented in this table has been gathered from sources deemed to be reliable (including the WaterSense® Program). However, neither the authors nor the organizations posting this listing on their websites make any guarantee as to its correctness, accuracy, completeness, or current status. Readers are encouraged to perform their own research at the WaterSense® website (noted above), manufacturer websites, and other sources.
